

Lesson 1

Animals  
including humans

Feb 17-17:30

Learning focus

Lesson 1

Aspiration

Consistently strive to  
do things to the best of  
our ability.

Feb 17-17:33

Learning objective

*How many animals do we know?*

*To understand that animals have different habitats*

Feb 17-17:37

working in 3 groups-  
record on A3 paper.

What do you already know?

You have 5 minutes to write down or draw every  
**animal/fish/amphibian/mammal** that you know.

Then we will share

Feb 17-17:39

Now think about where we find the animals you  
have written down.

*Add them to your piece of paper.*

Did you get any of these?

river sea house up trees  
jungle street woods field  
sky snow desert

Feb 18-13:18

An animal's home is called their:

habitat

It is their home environment and should provide what they need  
to survive.

Watch the clip and see how many habitats you can spot.

<https://www.bbc.com/bitesize/clips/zjynvcw>

Feb 18-13:30

river
 sea
 field
 up trees
 jungle
 house
 woods
 desert
 sky
 snow

Match the animal with the place it is found.

Feb 18-13:30

river
 sea
 field
 up trees
 jungle
 house
 woods
 desert
 sky
 snow

Match the animal with the place it is found.

Feb 18-13:30

Final thought

What can you remember about the features of these animals that helps them to survive in their habitats?

Then play the habitat quiz
