

# Year 5 Computing - Vector Drawing

## Vector Drawing

I can create a vector drawing by combining shapes, moving, resizing and rotating objects.

### Vocabulary vector drawing

object

move

resize

colour

rotate

duplicate/  
copy

undo

### Icon

Copy

Paste

### What does it do?

Select the object.

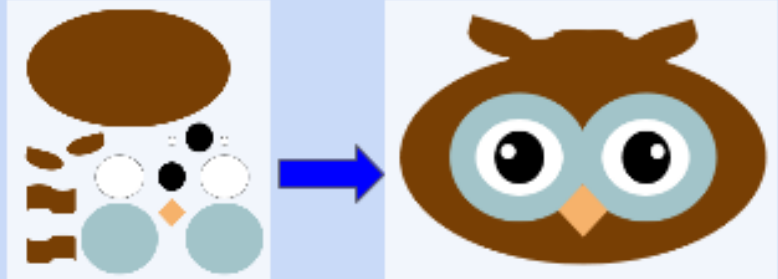

Click and drag the blue squares to resize.

Click the circular handle and drag to rotate the way you wish.

Press these on your keyboard to copy the selected item and then paste to duplicate it.

Press to undo the last thing you did.

A vector drawing is made up of objects:

Which can be duplicated:

Or can change colour, size or rotation:

Or use a size guide to match shapes:
